

# List of Tables

TABLE 1.1:	Types of data commonly taken on WHP cruises and what happens to them	4
TABLE 1.2:	Target planning timetable for WHP data	6
TABLE 2.1:	Approximate water volume requirements for measurements drawn from small volume water samplers	14
TABLE 2.2:	Suggested small volume sample drawing sequence	15
TABLE 2.3:	SI units and standard abbreviations	18
TABLE 2.4:	Prefixes for SI units	19
TABLE 2.5:	WHP one-time survey standards for water samples	20
TABLE 2.6:	WHP one-time survey standards for CTD measurements	21
TABLE 3.1:	Cruise plan outline	24
TABLE 3.2:	Estimated minimum personnel requirements for a WOCE one-time hydrographic survey	25
TABLE 3.3:	Assumptions used by the WHPO for calculating time required to do a WHP section	26
TABLE 3.4:	Outline of a cruise report (—.DOC file)	28
TABLE 3.5:	Sample station summary (—.SUM file for cruise report)	30
TABLE 3.6:	IOC and US NODC country codes	32
TABLE 4.1:	WHP small volume water sample record format description	39
TABLE 4.2:	JGOFS carbon dioxide record format description for —.SEA file	41
TABLE 4.3:	—.SEA and —.LVS file formatting	43
TABLE 4.4:	WHP large volume water sample record format description	44
TABLE 4.5:	Example of a merged data set in the —.SEA file	48
TABLE 4.6:	CTD record format definitions	50
TABLE 4.7:	Example of CTD record as submitted to the WHPO	51
TABLE 4.8:	Quality flag definitions for water bottles	52
TABLE 4.9:	Water sample quality flag definitions	53
TABLE 4.10:	Quality flag definitions for CTD data	55
TABLE 5.1:	Table of accuracies and reporting units for surface meteorological data for WOCE (adopted from Taylor and Weller, 1991)	64
TABLE B.1:	Parameters to be measured	87
TABLE B.2:	Participating institutions	88
TABLE B.3:	Cruise participants	90
TABLE B.4:	Sampling equipment and analyses methods	91
TABLE B.5:	Addresses, communication links, and agents	92
TABLE C.1:	Principal investigators	96

TABLE C.2:	Cruise participants . . . . .	101
TABLE C.3:	Calibration coefficients for the meteorological sensors. . . . .	109
TABLE C.4:	Salinity replicate and duplicate statistics . . . . .	111
TABLE C.5:	Statistics of duplicates and replicates obtained by both the photometric and amperometric methods. Sample depths are given where appropriate. . . . .	112
TABLE C.6:	(a) Laboratory measurements of hysteresis in pressure sensor dp5500(p) = (upcast – downcast) pressure at various pressures, p, in a simulated 5500 m cast. (b) revised form of hysteresis used for stations 12303–12337 . . . . .	123
TABLE C.7:	Digital RTM calibrations. $T_{cal} = b \times T_{raw} + a$ . . . . .	125
TABLE C.8:	Summary of RTM data. . . . .	125
TABLE E.1:	List of IBM PC (DOS and Windows) and Macintosh software and graphics that can be read by the WHPO. . . . .	135
TABLE G.1:	Water sample parameters that have been measured to date on WHP cruises and their assigned parameter numbers. . . . .	143
